

# bka ■ iPhone websites

Accessing information online via mobile technology is growing at an exponential rate - and over 60% of mobile internet browsing is done via iPhones.

## Tell your story, at a glance

Simplify your content to deliver exactly what your mobile visitor needs - who you are, what you offer, and how to find you.

## Remove barriers

The first time someone types in your URL from their iPhone, they are automatically redirected to a mobile-optimised experience.

## Increase your reach - fast

Get your mobile website in just a few days - there's no need for users to download an app.

## Ridiculously Affordable

A simple iPhone website won't cost the earth. bka has solutions for budgets from \$4500 upwards.

## Customised to fit

The choices are endless when it comes to customising your iPhone mobile experience to fit your customer's needs.

Think directories, store locators, event calendars, vouchers and more.
